About this event

🕒 Event lasts 9 hours 30 minutes

📢 Don't miss out when we gather 6 leading experts in the region in a hybrid event to share their findings, visions, and achievements, accomplished through large-scale 3D imaging and ultrahigh protein plexity spatial biology techniques! **This event is hybrid (on-line & on-site) format.**

💡 Hear how we are our biggest customer, from our R&D colleagues as they discuss how we can make use of these advanced technologies to make cancer and other serious diseases history.

🤝❤️🔬 In addition, to show our ongoing support and passion for imaging-based research in Asia, we are organising a travel award for early career researchers from the region to join the event in a lightning talks contest to share their dreams of revealing nature's complexity. The contest participants stand a chance to win a prize that will unlock new avenues of study in their research.

💛 This event is proudly organised with CMI- Center for Medical Innovation, Seoul National Univ. Hospital.

🌟 Grab the opportunity to network, hear latest discoveries in the field, discuss research ideas with like-minded researchers!
